

Art of the Analog Console

NEW - APB ProSpec™ Contracting Series

Las Vegas, NV

APB-DynaSonics, a company know for its critically acclaimed USA-manufactured Spectra and ProDesk analog audio consoles and ProRack-House and Monitor mixer is expanding its line to include 1 and 2 Rack Space Sound Contracting audio mixers.

Introduced at InfoComm 2010, the new ProSpec line includes both 8 Mic/Line by 3 output (Left-Right-Center) and 4 Mix/Line + 4 Stereo Line input by 3 output (Left-Right-Center) single rack space mixers intended for commercial AV applications. Typical of APB, these will maintain the same high quality audio and build standards of the company's desktop products including the use of Burr-Brown mic pre-amplifiers.

Also introduced are two 2-rack space ProSpec rack mount mixers, one of which includes the ability for automatic or manual microphone and line level control on a per channel basis. Both of these ProSpec models include 6 mic/line channels, each with a variable high pass filter linked to the channels Low Frequency EQ frequency setting. Both L-R and Mono (Center) mix buses are provided, including the two stereo line input channels. Limiters are provided on all primary outputs. Stereo and USB digital line inputs and outputs are also provided.

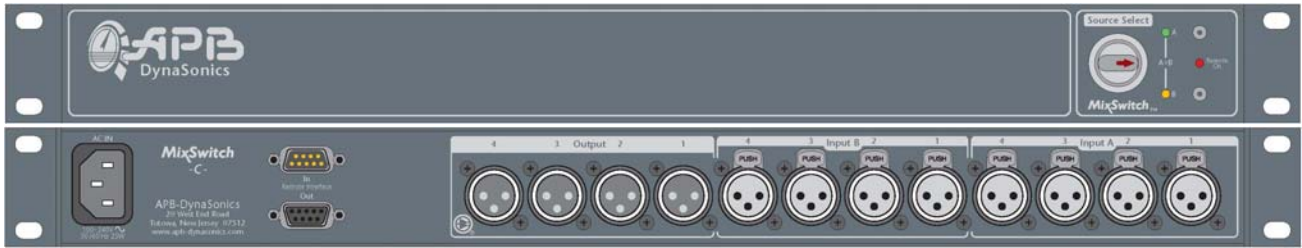

A new ProSpec contractor version of APB's MixSwitch product also will be displayed at InfoComm with a choice of a Keyed or Non-Keyed output source selection switch.

APB-DynaSonics is dedicated to the design and manufacture of superior quality analog mixing console, rack mount mixers and related products. For more information, please call 973.785.1101 or click our web site at www.apb-dynasonics.com for the latest information regarding these and other U.S. manufactured APB-DynaSonics products.
